

Sunfab UK Ltd

A new Sunfab subsidiary is born!

Sunfab UK Ltd, the latest subsidiary of Sunfab Hydraulics AB, has been created to provide even better market presence and support for its growing customer base in the UK.

The UK market will be looked after by Marc Burns and Julian Sharp, who join from Stallion Hydrocar (formerly the UK agent for Sunfab). With their in depth knowledge of the PTO and Pump market, and many years of experience in supplying packaged solutions, Julian and Marc are well placed to support existing customers and encourage new business.

Marc and Julian are excited about the new challenge: "This is a great opportunity for us to promote the Sunfab product and reliability to a varied audience. We're working hard to deliver to the UK the great reputation that the Sunfab brand enjoys in the rest of Europe today - and our customers really appreciate that."
